PROFESSIONAL SUMMARY

Full Stack Web Developer with demonstrated experience independently architecting and deploying production-grade web applications across e-commerce, music streaming, and client service domains. Founded Adithyaprabu Digital Studio at 21 — a revenue-generating freelance agency delivering 4+ client projects end-to-end, from Figma prototype to live Vercel deployment, within week-long turnaround cycles. At Haptrend Media, designed and shipped Gameszone — a complete e-commerce platform with a 500+ product MySQL backend and admin dashboard — solo in under two weeks. Proficient in JavaScript, PHP, React.js, Next.js, and MySQL, with applied experience in REST API integration, CI/CD deployment, SEO implementation, database design, and responsive UI development. Targeting full stack and software development roles where independent ownership, fast execution, and real-world deployment experience drive measurable product impact.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, React.js, Next.js, Tailwind CSS, Responsive UI, Mobile-First Design
Backend	PHP, REST API Development, Server-Side Rendering, Session Management, CRUD Operations
Database	MySQL, PostgreSQL, Relational Database Design, phpMyAdmin
DevOps	Git, GitHub, CI/CD, Vercel, Production Deployment, Web Performance Optimization, SEO Implementation
Design	Figma, UI/UX Design, Wireframing, Prototyping
Practices	SDLC, Agile Principles, Component-Based Architecture, Cross-Browser Testing, Debugging & Troubleshooting

WORK EXPERIENCE

Founder & Full Stack Developer

2026 – Present

Adithyaprabu Digital Studio (Freelance) | [adithyaprabudigitalstudio.vercel.app](#)

- Founded and currently operate a revenue-generating freelance digital studio at 21 — independently acquiring clients and delivering 4+ production projects across custom web development, design portfolios, and video editing for businesses across Tamil Nadu and India.
- Engineer and ship full stack client websites end-to-end in under one week per project — from requirement gathering and Figma wireframing through React.js / Next.js development and CI/CD deployment on Vercel — with zero post-delivery revision cycles.
- Manage the complete client engagement lifecycle as a one-person agency: UI/UX prototyping, full stack development, SEO metadata implementation, performance optimization, and live production deployment.
- Designed and deployed the studio's own marketing site in Next.js and React.js featuring mobile-first responsive design, structured SEO, and performance-optimized load times — deployed on Vercel as a live client-acquisition asset targeting businesses across India.

Web Development Intern

May 2025

Haptrend Media

- Sole developer on Gameszone — a complete full stack e-commerce web application — designed, built, and shipped solo in under two weeks; delivered as a fully functional live product without team support or senior oversight.
- Architected a relational MySQL database schema supporting 500+ product and transaction records, implementing normalized table design that reduced manual admin data-handling time by 40%.
- Engineered a feature-complete admin dashboard with full CRUD operations covering inventory management, order tracking, and user management — eliminating dependency on any third-party admin tool.
- Implemented session-based user authentication, real-time shopping cart, and dynamic category filtering across 50+ product listings — delivering a complete e-commerce user journey from product browse to checkout.

- Shipped a 100% responsive, cross-browser-compatible UI across 3 screen sizes using Bootstrap 5 and custom CSS3 animations; passed client UAT with zero post-launch UI defects.

Full Stack Development MasterClass

Mar – Apr 2024

NoviTech R&D Pvt. Ltd.

- Completed an intensive 30-day full stack program — building 5+ end-to-end web applications across the complete SDLC, covering HTML5/CSS3 front-end, PHP back-end, and MySQL database-driven application architecture.
- Applied SDLC principles and server-side rendering patterns across every project build; earned certificate demonstrating proficiency across the complete web development stack.

EDUCATION

B.Sc. Computer Science

2023 – 2026

J.J. College of Arts and Science, Bharathidasan University

- Core subjects: Operating Systems, Software Engineering, RDBMS, Computer Networks, IoT, Microprocessor Applications.
- Value-Added Courses: JavaScript Programming, Python Libraries — applied directly to live deployed projects and an industry internship.

PROJECTS

Gameszone — Full Stack E-Commerce Platform

2025 – Present

PHP · JavaScript · MySQL · Bootstrap 5 | games---zone.my-style.in

- Sole architect and developer — built and deployed end-to-end solo in under two weeks, demonstrating full ownership across relational database design, PHP back-end logic, front-end UI, and live production deployment.
- MySQL-backed schema handles 500+ product and transaction records; admin panel supports complete inventory, order, and user management. Gaming-inspired responsive UI tested across 3 screen sizes.

SriMusic — Tamil Cinema Music Streaming App

2026 [LIVE]

PHP · JavaScript · MySQL · HTML5 · CSS3 | sri-music.is-great.net

- Designed, developed, and deployed a fully functional music streaming web application solo in under one month — supporting 100+ songs with artist, movie, and genre browsing, a custom HTML5 audio player, and playlist functionality.
- MySQL-backed song management with metadata support, admin upload panel, play-count tracking, and real-time live search. Deployed on live hosting with GitHub version control from Day 1.

Adithyaprabu Digital Studio — Agency Website

2026 [LIVE]

Next.js · React.js · Tailwind CSS · Vercel | adithyaprabudigitalstudio.vercel.app

- Built and deployed the studio's official website — a live, revenue-supporting marketing asset — featuring SEO implementation, performance-optimized load times, and mobile-first responsive UI targeting client acquisition across India.
